This booklet contains modifications to the management plan for the Prescott Active Management Area ("AMA") for the third management period, 2000 to 2010 ("Third Management Plan"). The Third Management Plan was adopted by the Director of Water Resources ("Director") in December 1999. It is the third in a series of five management plans mandated by the 1980 Groundwater Management Act. As required by the Act, the Third Management Plan contains mandatory conservation requirements for persons withdrawing, distributing or using groundwater within the Prescott AMA. The Third Management Plan also contains a Groundwater Quality Management Program, an Augmentation and Recharge Program, a Water Management Assistance Program and a chapter on plan implementation.

The Third Management Plan was modified in 2003 to comply with legislation enacted in 2002 requiring the Director to calculate irrigation water duties for most farms regulated under the Base Agricultural Conservation Program using an irrigation efficiency of 80 percent and requiring the Director to include as a modification to the Third Management Plan an Agricultural Best Management Practices Program as an alternative to the Base Program. At that time, modifications were also made to the Municipal and Industrial Conservation Programs, as well as to the Water Management Assistance Program.

The modifications contained in this booklet were adopted by the Director on April 1, 2008, and became effective on May 20, 2008. The following is a description of the modifications:

1. The Director modified the Non-Per Capita Conservation Program ("NPCCP") for large municipal providers in the municipal conservation program of the Third Management Plan as required by legislation enacted during the 2007 legislative session (Laws 2007, Ch. 139). Under the modified NPCCP, all large municipal providers that are not designated as having an assured water supply and that are not regulated as an institutional provider must submit a provider profile to the Director by July 1, 2009 and be regulated under the modified NPCCP beginning January 1, 2010 or the date the Director approves the provider's provider profile, whichever is later. Large municipal providers regulated under the modified NPCCP must implement a public education program, a metering program and one or more additional water conservation measures to be selected from a list of measures included in the program. The number of additional water conservation measures that a provider must implement is determined by the number of service connections to the provider's water distribution system.

A large municipal provider designated as having an assured water supply will continue to be regulated under its existing municipal conservation program unless it elects to be regulated under the modified NPCCP. The conservation program for small municipal providers, whose average annual use is less than 250 acre-feet, is unaffected by the modifications.

2. The Director made a number of conforming changes to the text of Chapter 5 of the Third Management Plan, as well as to the municipal conservation and monitoring and reporting requirements and the appendices.

The official language of the modifications described above is set forth in the pages that follow. The Arizona Department of Water Resources appreciates the input it received from the Prescott AMA Groundwater Users Advisory Council and the large group of public stakeholders in developing the modifications. Anyone desiring more information about the modifications or the Third Management Plan should contact the Prescott AMA office at 928-778-7202.

Sincerely,

5.1 INTRODUCTION

5.2 STATUTORY PROVISIONS

5.2.1 Per Capita Requirements for Large Municipal Providers

The Groundwater Code (Code) requires that the management plans for each AMA include a conservation program for municipal uses. For the first, second, and third management plans, the Code expressly mandates that the programs require reasonable reductions in per capita use. A.R.S. §§ 45-564(A)(2), 45-565(A)(2), and 45-566(A)(2). To comply with this mandate the Department developed the Total Gallons Per Capita Per Day Program (Total GPCD Program). As originally enacted, the Code did not exempt any municipal providers from the requirement to achieve reductions in per capita use. Consequently, the municipal conservation program in the First Management Plan established maximum gallons per capita per day (GPCD) requirements for all municipal providers, regardless of size.

In 1986, the Legislature amended the statutes governing the second and third management plans to exempt "small municipal providers" from the requirement to achieve reasonable reductions in per capita use. Laws 1986, Ch. 107, §§ 2 and 3. Instead of requiring small municipal providers to achieve reductions in per capita use, the statutes require the director to establish "reasonable conservation requirements for small municipal providers." A.R.S. §§ 45-565(A)(4) and 45-566(A)(4). Until 1994, "small municipal provider" was defined in the Code as "a city, town, private water company or irrigation district that supplies water for non-irrigation use, serves less than five hundred people and supplies less than one hundred acre-feet of water for non-irrigation use during a calendar year." Laws 1986, Ch. 107, § 1. In 1994, the Legislature changed the definition of small municipal provider to "a municipal provider that supplies two hundred fifty acre-feet or less of water for non-irrigation use during a calendar year." A.R.S. § 45-561(13).

~~Two~~ THREE other statutory amendments have created exceptions to the requirement that municipal providers achieve reasonable reductions in per capita use. In 1991, the Legislature exempted large untreated water providers from the requirement to achieve reductions in per capita use. Laws 1991, Ch. 211, §§ 16, 17, and 18. In 1992, the Legislature enacted legislation requiring the director to include in each management plan a Non-Per Capita Conservation Program for large municipal providers as an optional, alternative program to the program requiring reductions in per capita use. Laws 1992, Ch. 183, §§ 5, 7, and 9. Those amendments are described in greater detail in the following two sections. IN 2007, THE LEGISLATURE ENACTED LEGISLATION REQUIRING THE DIRECTOR TO MODIFY THE NON-PER CAPITA CONSERVATION PROGRAM IN THE THIRD MANAGEMENT PLAN. THE 2007 LEGISLATION REQUIRES ALL LARGE MUNICIPAL PROVIDERS THAT ARE NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ARE NOT LARGE UNTREATED WATER PROVIDERS TO BE REGULATED UNDER THE NEW NON-PER CAPITA CONSERVATION PROGRAM BEGINNING JANUARY 1, 2010, OR THE DATE THEIR PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, WHICHEVER IS LATER. LARGE MUNICIPAL PROVIDERS THAT ARE DESIGNATED AS HAVING AN ASSURED WATER SUPPLY MAY ELECT TO BE REGULATED UNDER THE NPCCP.

5.2.2 Non-Per Capita Conservation Requirements for Large Municipal Providers

In 1992, the Legislature enacted legislation requiring the Department to include in the management plans a Non-Per Capita Conservation Program (NPCCP) as an optional, alternative program to the Total GPCD. Program requiring reasonable reductions in per capita use. Each provider regulated under the NPCCP is required to implement specific residential and non-residential conservation programs for interior and exterior water use, a public education program relating to water conservation, and a program to meter most service area connections. Additionally, providers who are regulated under the NPCCP are required to either reduce their groundwater pumping consistent with the Assured Water Supply Rules (AWS Rules) (A.A.C. R12-15-701, *et seq.*) or eliminate their use of mined groundwater by the year 2010. The NPCCP is a performance based program with compliance determined by the effective implementation of stipulated conservation measures and the required groundwater reduction. For the Third Management Plan, the statutory requirements for the NPCCP are found at A.R.S. § 45-566.01.

IN 2007, LEGISLATION WAS ENACTED REQUIRING THE DIRECTOR TO MODIFY THE THIRD MANAGEMENT PLAN TO REPLACE THE PREVIOUSLY ADOPTED NPCCP WITH A NEW NPCCP. THE LEGISLATION PROVIDES THAT THE NEW NPCCP SHALL REQUIRE A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE PROGRAM TO IMPLEMENT WATER CONSERVATION MEASURES WITHIN ITS SERVICE AREA, INCLUDING A PUBLIC EDUCATION PROGRAM, A METERING PROGRAM AND ONE OR MORE ADDITIONAL WATER CONSERVATION MEASURES. THE DIRECTOR IS REQUIRED TO INCLUDE IN THE MANAGEMENT PLAN A LIST OF WATER CONSERVATION MEASURES THAT A PROVIDER MUST SELECT FROM TO COMPLY WITH THE NPCCP. THE DIRECTOR MUST DESIGN THE NEW NPCCP TO ACHIEVE A WATER USE EFFICIENCY IN THE SERVICE AREA OF PROVIDERS REGULATED UNDER THE PROGRAM EQUIVALENT TO THE WATER USE EFFICIENCY ASSUMED BY THE DIRECTOR IN ESTABLISHING THEIR TOTAL GPCD REQUIREMENTS. UNLIKE THE PREVIOUS NPCCP, THERE IS NO REQUIREMENT THAT A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NEW NPCCP LIMIT ITS GROUNDWATER USE TO A SPECIFIED VOLUME WHILE REGULATED UNDER THE PROGRAM.

A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT REGULATED AS AN INSTITUTIONAL PROVIDER IS REQUIRED TO BE REGULATED UNDER THE NEW NPCCP BEGINNING JANUARY 1, 2010, OR THE DATE THE PROVIDER'S PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, WHICHEVER IS LATER. HOWEVER, A LARGE MUNICIPAL PROVIDER MAY AGREE TO BE REGULATED UNDER THE NPCCP EARLIER THAN JANUARY 1, 2010 IF THE DIRECTOR APPROVES THE PROVIDER'S PROVIDER PROFILE BEFORE THAT DATE. ALTHOUGH LARGE MUNICIPAL PROVIDERS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY ARE NOT REQUIRED TO BE REGULATED UNDER THE NPCCP, THEY MAY ELECT TO BE REGULATED UNDER THE PROGRAM BY SUBMITTING TO THE DIRECTOR A WRITTEN NOTICE OF THE ELECTION AND A PROVIDER PROFILE THAT IS SUBSEQUENTLY APPROVED BY THE DIRECTOR. THE NPCCP IS SET FORTH IN SECTION 5-104 OF THE THIRD MANAGEMENT PLAN.

5.4 ASSURED WATER SUPPLY PROGRAM

The Code requires persons proposing to offer subdivided lands for sale or lease within an AMA to demonstrate that the proposed subdivision has an assured water supply. A.R.S. § 45-576. If a subdivider fails to demonstrate that a proposed subdivision has an assured water supply, the plat for the subdivision may not be approved by a city, town, or county, and the state Real Estate Commissioner may not issue a public report authorizing the sale or lease of the subdivided lands. A.R.S. § 45-576(B) and (C).

There are two mechanisms for demonstrating that a proposed subdivision has an assured water supply. First, the subdivider may apply for and obtain a Certificate of Assured Water Supply (Certificate of AWS) from the director. Second, the subdivider may obtain a written commitment of water service for the subdivision from a city, town, or private water company which the director has designated as having an assured water supply. A.R.S. § 45-576(A). For both of these purposes, "assured water supply" means that sufficient water of adequate quality will be continuously available to meet the water needs of the proposed use for at least 100 years; that the projected use is consistent with the management plan (i.e conservation requirement and recharge recovery criteria) and achievement of the safe-yield management goal for the AMA; and that the financial capability has been demonstrated to construct the water facilities necessary to make the supply of water available for the proposed use, including a delivery system and any storage facilities or treatment works. A.R.S. § 45-576(I).

In 1995, the Department adopted rules to carry out the purposes of the assured water supply statute. A.A.C. R12-15-701, *et seq.* The AWS Rules specify in detail what an applicant for a Certificate of AWS or a Designation of Assured Water Supply (Designation of AWS) must demonstrate. Of particular relevance to the municipal conservation program are the requirements for demonstrating that a proposed use is consistent with the management plan and achievement of the management goal for the AMA.

The AWS Rules state:

~~In the Prescott Active Management Area, the proposed use of an applicant for a certificate of assured water supply or a designation of assured water supply is consistent with the achievement of the management goal of the active management area, regardless of the volume of groundwater withdrawn from within the active management area for the proposed use, until the director enters a final decision and order determining that the Prescott Active Management Area is no longer at safe yieldA.A.C. R12-15-705(B).~~

Under the AWS Rules, after the director collected three consecutive years of normalized information indicating that the AMA is mining groundwater, the director was required to make a determination that the AMA is no longer at safe-yield. A Preliminary Decision that the AMA is no longer at safe-yield was made on August 28, 1998 and the director issued the Final Decision and Order that the AMA is no longer at safe-yield on January 12, 1999, after a public hearing and review process was undertaken. Water providers and future subdivisions which apply to the Department for Designations or Certificates of Assured Water Supply are now required to acquire renewable water to meet the water needs of new development. A.A.C. R12-15-705(F) 722(A).

5.4.1 Consistency With Management Goal

In order to demonstrate that a proposed use is consistent with the management goal of an AMA, the AWS Rules require applicants to demonstrate that renewable or imported supplies will be used to satisfy most of the water demand of the development or water service area for 100 years. A.A.C. R12-15-705 722. For a

municipal provider in the Prescott AMA applying for a Designation of AWS, this means that most of the water demand customers in new subdivision will have to be met with water supplies other than mined groundwater from within the AMA.

In 1998 the State Legislature enacted legislation dealing with the potential declaration that the Prescott AMA is no longer at safe-yield. The legislation required the Department to initiate the administrative process to determine the AMA's safe-yield status, to adopt interim guidelines prohibiting mined groundwater from being used to demonstrate an assured water supply until a final decision on the AMA's safe-yield status, and to amend the Department's AWS Rules after a declaration that the AMA is no longer at safe-yield. The AWS Rules ~~shall be~~ HAVE BEEN amended to specify the volume of groundwater that a designated municipal provider may serve to subdivisions which were approved (according to criteria in the legislation) prior to the effective date of the legislation.

5.6 MUNICIPAL PROGRAM ISSUES

[No change]

5.6.1 Private Water Company Issues

Some municipal water providers regulated under the Municipal Conservation Program are privately-owned companies separate from the city, town, or county in which they are located. While local plumbing and landscape ordinances may apply within the private water company service area, the water company itself lacks the authority to enact ordinances regulating water use by the citizens of these communities. In addition to being regulated by the Department, private water companies are regulated by the Arizona Corporation Commission (ACC), an elected body whose mission includes exercising exclusive state regulatory authority over public service corporations (public utilities) in the public interest. The ACC monitors the operations of approximately 350 private water utility companies throughout Arizona, reviewing company financial records and recommending revenue requirements and rates and charges to be collected. The regulatory responsibilities of the ACC are fully defined in Article XV of the Arizona Constitution and §§ 40-201, *et seq.*, Arizona Revised Statutes, including A.R.S. § 40-250, requiring that all public service corporations obtain ACC approval before establishing or changing any rate.

Private water companies have raised several issues regarding the relationship of the Department's requirements and the ACC's review of rate recovery associated with the requirements. The most significant issues identified include: (1) the perception of uncertainty in the ability to recover the holding costs of CAP subcontracts and financing the construction of facilities for receipt and use of renewable supplies and (2) the impact of the ACC's position in rate cases that implementation of conservation programs is discretionary, because the Department does not identify specific conservation programs or measures needed to be carried out by the provider.

These issues have been extensively reviewed and discussed by the Department staff, private water company representatives, and ACC staff. The ACC has indicated that "although they cannot guarantee recovery of costs prior to their incurrence" they would consider cost recovery for the use of renewable supplies and the implementation of conservation measures, applying the principles of "used and useful" and "least-cost alternative." In the past, these principles have meant that a provider would have to be actively providing a resource in order to recover costs and any conservation measure implemented would have to be the most cost-effective before the recovery of costs would be allowed. Private water companies argue that these principles do not guarantee cost recovery as they are considered by the Commission on a case-by-case basis.

~~During the development of the Third Management Plan, the Department explored the possibility of establishing a municipal conservation program designed exclusively for private water companies. In order to meet the goals of the Department and obtain the support of the ACC, the Department considered a program that would mandate specific conservation measures and reduce reliance on groundwater supplies. Upon further examination, it was determined that additional statutory authority would be needed to implement such a program. It was decided by the Department not to pursue this action at this time. However, Department staff, with the cooperation of the regulated community, will continue to explore options, including continued dialogue between the two agencies aimed at establishing a united goal in achieving the most economically efficient reduction in reliance on mined groundwater by private water companies including providing more certainty of cost recovery for providers.~~

5.7 THIRD MANAGEMENT PLAN MUNICIPAL CONSERVATION PROGRAM

[No change]

5.7.1 Conservation Requirements for Large Municipal Providers

The Department identified existing water use patterns and service area characteristics that influence a large municipal provider's water conservation potential in order to establish conservation requirements for large municipal providers in the Second Management Plan. Assumptions about future service area population growth and water supply and demand were also included in the analysis. This assessment was referred to as the "municipal provider profile." For the Third Management Plan, the Department used a similar approach to identify service area water use characteristics. Information was gathered through Annual Water Withdrawal and Use reports including water deliveries, monthly water use by sector, water source, and number of housing units added to the service area annually. Additional information included annual population estimates based on the municipal provider-supplied housing unit information from the annual reports, Arizona Department of Economic Security persons per housing unit data, and individual interviews with large municipal providers to assess existing water conservation programs to determine water conservation potential.

EXCEPT AS PROVIDED IN THE NEXT PARAGRAPH, the Code requires additional reasonable reductions in per capita use by large municipal providers in the Third Management Plan. Pursuant to this statutory requirement, the Department will calculate a total GPCD requirement for each large municipal provider. Each large municipal provider will be noticed of its total GPCD requirements for its service area. Municipal providers may apply for variance from or administrative review of the conservation requirements within 90 days after the notice is given. Alternatively, a large municipal provider THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY may apply for ~~one of the alternative conservation programs: the Non-Per Capita Conservation Program (NPCCP), the Alternative Conservation Program (ACP), or the Institutional Provider Program (IPP)~~ ELECT TO BE REGULATED UNDER THE NON-PER CAPITA CONSERVATION PROGRAM (NPCCP). Large municipal providers

DESIGNATED AS HAVING AN ASSURED WATER SUPPLY who do not ~~apply for~~ ENROLL IN an alternative program will be regulated under the Total GPCD Program.

AS EXPLAINED IN GREATER DETAIL IN SECTION 5.7.1.2, LARGE MUNICIPAL PROVIDERS THAT ARE NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ARE NOT REGULATED AS INSTITUTIONAL PROVIDERS WILL BE REGULATED UNDER THE NPCCP BEGINNING ON JANUARY 1, 2010 OR THE DATE THEIR PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, WHICHEVER IS LATER. UNTIL THEN, THEY MUST CONTINUE TO COMPLY WITH THE MUNICIPAL CONSERVATION PROGRAM UNDER WHICH THEY WERE REGULATED AS OF JANUARY 1, 2008. A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE INSTITUTIONAL PROVIDER PROGRAM DESCRIBED IN SECTION 5.7.1.4 SHALL CONTINUE TO BE REGULATED UNDER THAT PROGRAM.

5.7.1.1 Total Gallons Per Capita Per Day Program

As in previous management periods, EXCEPT AS PROVIDED IN SECTION 5.7.1.2, the base municipal program for the Third Management Plan will be the Total GPCD Program. All large municipal providers regulated under this program must limit the annual gallons per capita per day water usage within its service area to the amount allowed under its total GPCD requirements.

For the third management period, an annual total GPCD requirement will be calculated using a “component method.” The components of the total GPCD requirement are: existing residential use, new single family residential use, new multifamily residential use, non-residential use, and lost and unaccounted for water. Each component has an assigned per capita per day use rate as shown in Table 5-103.A and Section 5-103 of the Municipal Conservation Requirements at the end of this chapter. Each year IN WHICH THE PROVIDER IS REGULATED UNDER THE TOTAL GPCD PROGRAM, the sum of the per capita per day component volumes will be multiplied by the actual population in the service area in that year. The resulting allowable volume will be compared to the actual amount of water withdrawn, diverted, or received in the calendar year to determine compliance DURING THAT YEAR.

[No change]

5.7.1.1.1.3 Analysis of Non-Residential Uses

In the Second Management Plan, the proportion of non-residential water use to residential water use was held constant from base year levels for each provider. It was assumed that providers would have the ability to utilize non-potable supplies for new non-residential uses such as turf-related facilities and landscaping within industrial and commercial facilities. Specifically, the direct use of effluent to serve these needs would allow a provider to remain in compliance with municipal conservation requirements. Providers were also given the option of entering the ACP or the NPCCP, which did not contain per capita requirements for non-residential use. The alternative program did place a limit on mined groundwater use, however.

Non-residential water use by the two large providers for the past eleven years was evaluated in the Prescott AMA. Non-residential water use has increased in the Prescott Valley Water District water service area 387 percent since 1987. The proportion of deliveries for non-residential use in Prescott Valley Water District's service area has increased ten percent, from 16 percent in 1987 to 26 percent of total deliveries in 1995. Non-residential deliveries in the Prescott service area have increased 39 percent since 1987, but unlike Prescott Valley Water District, the proportion of total deliveries for non-residential uses has remained fairly constant over time.

PRESCOTT ACTIVE MANAGEMENT AREA

[No change]

Potential for effluent reuse still exists within the municipal sector. The exclusion of direct use effluent or effluent recovered inside the area of impact from the total GPCD requirement will continue through the third management period. Providers REGULATED UNDER THE TOTAL GPCD PROGRAM will also continue to have the option of applying for ENROLLING IN the ACP or the NPCCP, neither of which limits the per capita water use for the non-residential sector. Because providers with disproportionate increases in non-residential water use are expected to enter the ACP or the NPCCP, a provider's non-residential GPCD component in the Third Management Plan will remain the same as assumed for the provider in the final GPCD requirements in the Second Management Plan.

~~5.7.1.2 Non-Per Capita Conservation Program~~

~~The NPCCP was added to the Second Management Plan in 1995 after being developed in cooperation with representatives of the water using community. This program requires a provider to implement specific conservation measures within its service area instead of requiring compliance with per capita conservation requirements. A provider in this program must implement reasonable conservation measures, or RCMs, for interior and exterior residential water uses and interior and exterior non-residential uses, as well as an education program. The RCMs must be designed to result in water use efficiency within the provider's service area equivalent to the water use efficiency assumed in the provider's total GPCD requirement. The~~

Department has established a list of standard RCMs which are designed to achieve an efficiency equivalent to the assumptions used in the Total GPCD Program. However, if the standard RCMs do not fit the service area characteristics of a provider, the program allows the provider the flexibility to substitute measures that are designed to achieve the same savings yet fit the unique characteristics of the provider's service area.

5.7.1.2.1 — Groundwater Use Reduction Requirement

The provider must meet one of the following requirements to be eligible to participate in the NPCCP:— (1) the provider must be a member of a groundwater replenishment district, (2) the provider must be designated as having a 100-year assured water supply under the Department's AWS Rules, or (3) the provider must implement a plan to reduce mined groundwater withdrawals to zero by the year 2010 using a straight-line volumetric reduction.

5.7.1.2.2 — Reasonable Conservation Measures

A set of standard Residential, Non-Residential, and Education RCMs were developed by the Department with the aid of an advisory group made up of conservation program experts from the regulated community. Each RCM prescribes actions that must be taken by the provider to achieve water use efficiencies in each sector. Providers who have already implemented these measures will be required to implement additional conservation measures, consistent with the conservation potential for their service area, to qualify for the program. The Standard RCMs are outlined below. Additional substitute RCMs (Appendix 5D.4) were developed to allow a provider to develop a conservation program that meets the characteristics of its service area. In order for a provider to use a substitute RCM in place of a Standard RCM, the provider must apply to the director and demonstrate that the substitute RCM will be designed to achieve a water use efficiency equivalent to the Standard RCM.

Standard RCMs

5. *One additional landscape RCM from the three below (Choice of one of the following)*
 - a) Ordinance or Condition of New Service Limiting Use of Turf and Other Water-Intensive Landscaping in New Multifamily Developments; **or**
 - b) Ordinance or Condition of New Service Limiting Use of Turf and Other Water-Intensive Landscaping in Common Areas of New Single Family and Multifamily Developments; **or**
 - e) Rebate Program for New Residential Customers

C. Non-Residential Interior

~~A large municipal provider regulated under the NPCCP is in compliance with the program if it implements the agreed to RCMs and limits its use of groundwater to the amount allowed under the AWS Rules or the amount allowed under the straight line reduction, whichever is applicable. The Department will use the written agreement for the NPCCP to monitor progress with the program. Each year, along with the Annual Water Withdrawal and Use Report, the municipal provider will be required to submit a progress report describing the implementation of each RCM, the cost of implementing the program, estimated or actual water savings, and a description of any difficulties with the program.~~

5.7.1.2 Non-Per Capita Conservation Program

A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT REGULATED AS AN INSTITUTIONAL PROVIDER WILL BE REGULATED UNDER THE NPCCP BEGINNING JANUARY 1, 2010, OR THE DATE ITS PROVIDER PROFILE IS APPROVED BY THE DIRECTOR AS PROVIDED IN SECTION 5.7.1.2.1, WHICHEVER IS LATER. THE LARGE MUNICIPAL PROVIDER MAY AGREE TO BE REGULATED UNDER THE NPCCP EARLIER THAN JANUARY 1, 2010 IF THE DIRECTOR APPROVES THE PROVIDER'S PROVIDER PROFILE PRIOR TO THAT DATE. A LARGE MUNICIPAL PROVIDER THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY MAY ELECT TO BE REGULATED UNDER THE NPCCP BY PROVIDING WRITTEN NOTICE OF THE ELECTION TO THE DIRECTOR, WHICH MUST INCLUDE A PROVIDER PROFILE AS DESCRIBED IN SECTION 5.7.1.2.1. THE PROVIDER WILL BE REGULATED UNDER THE NPCCP IF THE DIRECTOR APPROVES THE PROVIDER PROFILE. A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP IS EXEMPT FROM THE REQUIREMENTS OF THE TOTAL GPCD PROGRAM.

THE NPCCP IS A PERFORMANCE-BASED PROGRAM. EACH YEAR WHILE REGULATED UNDER THE PROGRAM, A PROVIDER MUST COMPLY WITH THE METERING REQUIREMENTS IN SECTION 5-113(5) AND IMPLEMENT A PUBLIC EDUCATION PROGRAM RELATING TO WATER CONSERVATION AND ONE OR MORE ADDITIONAL WATER CONSERVATION MEASURES WITHIN ITS SERVICE AREA. THE NUMBER OF ADDITIONAL WATER CONSERVATION MEASURES THAT MUST BE IMPLEMENTED DEPENDS ON THE TOTAL NUMBER OF RESIDENTIAL AND NON-RESIDENTIAL SERVICE CONNECTIONS TO THE PROVIDER'S WATER DISTRIBUTION SYSTEM AND THE TIER LEVEL FOR THAT NUMBER OF CONNECTIONS (SEE SECTION 5.7.1.2.2). THE PROVIDER MUST SELECT THE ADDITIONAL WATER CONSERVATION MEASURES FROM A LIST OF MEASURES APPROVED BY THE DIRECTOR. THE INITIAL LIST OF APPROVED ADDITIONAL WATER

CONSERVATION MEASURES IS SET FORTH IN APPENDIX 5H. THE DIRECTOR MAY MODIFY THE LIST TO INCLUDE ADDITIONAL WATER CONSERVATION MEASURES PURSUANT TO THE PROCEDURE SET FORTH IN APPENDIX 5H. ALL ADDITIONAL WATER CONSERVATION MEASURES SELECTED BY THE PROVIDER MUST BE REASONABLY RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS.

THE PROVIDER MUST IDENTIFY THE WATER CONSERVATION MEASURES THAT IT WILL IMPLEMENT IN ITS PROVIDER PROFILE THAT MUST BE SUBMITTED TO THE DIRECTOR BEFORE THE PROVIDER IS REGULATED UNDER THE NPCCP. IF THE DIRECTOR APPROVES THE PROVIDER PROFILE, THE PROVIDER MUST IMPLEMENT THE WATER CONSERVATION MEASURES IDENTIFIED IN THE PROVIDER PROFILE, UNLESS THE PROVIDER IMPLEMENTS A SUBSTITUTE WATER CONSERVATION MEASURE AS DESCRIBED IN SECTION 5.7.1.2.2. IF THE TOTAL NUMBER OF SERVICE CONNECTIONS TO THE PROVIDER'S WATER DISTRIBUTION SYSTEM INCREASES TO A HIGHER TIER LEVEL AFTER THE PROVIDER'S PROVIDER PROFILE HAS BEEN APPROVED BY THE DIRECTOR, THE PROVIDER MUST SUBMIT TO THE DIRECTOR A NEW PROVIDER PROFILE WITH THE APPROPRIATE NUMBER OF ADDITIONAL WATER CONSERVATION MEASURES FOR THE NEW TIER LEVEL. THE PROVIDER MUST BEGIN IMPLEMENTING ALL OF THE WATER CONSERVATION MEASURES DESCRIBED IN THE NEW PROVIDER PROFILE WHEN IT IS APPROVED BY THE DIRECTOR.

5.7.1.2.1 PROVIDER PROFILE

A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT REGULATED AS AN INSTITUTIONAL PROVIDER MUST SUBMIT A PROVIDER PROFILE TO THE DIRECTOR ON OR BEFORE JULY 1, 2009, OR WITHIN SIX MONTHS AFTER FIRST RECEIVING WRITTEN NOTICE OF ITS THIRD MANAGEMENT PLAN CONSERVATION REQUIREMENTS FROM THE DIRECTOR, WHICHEVER IS LATER. A LARGE MUNICIPAL PROVIDER THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ELECTS TO BE REGULATED UNDER THE NPCCP MUST SUBMIT A PROVIDER PROFILE TO THE DIRECTOR AT THE TIME THE PROVIDER GIVES WRITTEN NOTICE OF THE ELECTION TO THE DIRECTOR.

A PROVIDER PROFILE MUST CONTAIN THE FOLLOWING INFORMATION: (1) A DESCRIPTION OF THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS AND WATER USE PATTERNS; (2) A DESCRIPTION OF THE CONSERVATION MEASURES THE PROVIDER IS CURRENTLY IMPLEMENTING; (3) A DESCRIPTION OF THE PUBLIC EDUCATION PROGRAM AND ADDITIONAL WATER CONSERVATION MEASURES THAT THE PROVIDER INTENDS TO IMPLEMENT TO COMPLY WITH THE NPCCP; AND (4) AN EXPLANATION OF HOW THE ADDITIONAL WATER CONSERVATION MEASURES ARE RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS. WITHIN 90 DAYS AFTER RECEIVING A PROVIDER PROFILE, THE DIRECTOR MUST EITHER APPROVE OR DISAPPROVE THE PROVIDER PROFILE AND SEND WRITTEN NOTICE OF THE DECISION TO THE PROVIDER. THE DIRECTOR IS REQUIRED TO APPROVE A PROVIDER PROFILE IF THE PROFILE DEMONSTRATES THAT THE PROVIDER WILL IMPLEMENT THE PUBLIC EDUCATION PROGRAM RELATING TO WATER CONSERVATION DESCRIBED IN APPENDIX 5H AND THE REQUIRED NUMBER OF ADDITIONAL WATER CONSERVATION MEASURES, AND THAT THE ADDITIONAL WATER CONSERVATION MEASURES ARE REASONABLY RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS. IF THE DIRECTOR DOES NOT SEND WRITTEN NOTICE APPROVING A PROVIDER PROFILE WITHIN 90 DAYS AFTER RECEIVING THE PROFILE, THE PROVIDER

PROFILE WILL BE DEEMED APPROVED. IF THE DIRECTOR DISAPPROVES A PROVIDER PROFILE, THE PROVIDER MAY APPEAL THE DIRECTOR'S DECISION.

IF THE DIRECTOR DISAPPROVES A PROVIDER PROFILE SUBMITTED BY A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT REGULATED AS AN INSTITUTIONAL PROVIDER, THE PROVIDER MUST REVISE THE PROVIDER PROFILE TO CORRECT THE DEFICIENCIES AND SUBMIT THE REVISED PROVIDER PROFILE TO THE DIRECTOR WITHIN 90 DAYS AFTER RECEIVING WRITTEN NOTICE OF THE DISAPPROVAL, OR WITHIN 90 DAYS AFTER THE DIRECTOR'S DECISION DISAPPROVING THE PROVIDER PROFILE IS FINAL IF THE DIRECTOR'S DECISION IS APPEALED.

IF THE DIRECTOR DISAPPROVES A PROVIDER PROFILE SUBMITTED BY A LARGE MUNICIPAL PROVIDER THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY, THE PROVIDER MAY REVISE THE PROVIDER PROFILE TO CORRECT THE DEFICIENCIES AND SUBMIT THE REVISED PROVIDER PROFILE TO THE DIRECTOR. IF THE PROVIDER DOES NOT SUBMIT A REVISED PROVIDER PROFILE TO THE DIRECTOR, THE PROVIDER WILL NOT BE REGULATED UNDER THE NPCCP, BUT WILL CONTINUE TO BE REGULATED UNDER ITS EXISTING CONSERVATION PROGRAM.

WITHIN 90 DAYS AFTER RECEIVING A REVISED PROVIDER PROFILE, THE DIRECTOR MUST APPROVE OR DISAPPROVE THE PROVIDER PROFILE AND SEND WRITTEN NOTICE OF THE DECISION TO THE PROVIDER. IF THE DIRECTOR DOES NOT SEND WRITTEN NOTICE APPROVING OR DISAPPROVING THE REVISED PROVIDER PROFILE WITHIN THAT TIME PERIOD, THE REVISED PROFILE WILL BE DEEMED APPROVED. IF THE DIRECTOR DISAPPROVES A REVISED PROVIDER PROFILE, THE PROVIDER MAY APPEAL THE DECISION. IF THE PROVIDER IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY, THE PROVIDER IS OUT OF COMPLIANCE WITH ITS CONSERVATION REQUIREMENTS BEGINNING ON THE DATE THE DIRECTOR'S DECISION DISAPPROVING THE REVISED PROVIDER PROFILE IS FINAL UNTIL THE PROVIDER SUBMITS A PROVIDER PROFILE THAT IS APPROVED BY THE DIRECTOR.

A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT REGULATED AS AN INSTITUTIONAL PROVIDER WILL BE REGULATED UNDER THE NPCCP BEGINNING JANUARY 1, 2010 OR THE DATE ITS PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, WHICHEVER IS LATER. HOWEVER, THE PROVIDER MAY AGREE TO BE REGULATED UNDER THE NPCCP EARLIER THAN JANUARY 1, 2010 IF THE DIRECTOR APPROVES THE PROVIDER'S PROVIDER PROFILE EARLIER THAN THAT DATE. A LARGE MUNICIPAL PROVIDER THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ELECTS TO BE REGULATED UNDER THE NPCCP WILL BE REGULATED UNDER THE NPCCP IF THE DIRECTOR APPROVES THE PROVIDER'S PROVIDER PROFILE.

5.7.1.2.2 WATER CONSERVATION MEASURES

IN ADDITION TO THE METERING REQUIREMENTS IN SECTION 5-113(5), A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST IMPLEMENT A PUBLIC EDUCATION PROGRAM RELATING TO WATER CONSERVATION AND ONE OR MORE ADDITIONAL WATER CONSERVATION MEASURES. THE REQUIRED COMPONENTS OF THE PUBLIC EDUCATION PROGRAM ARE DESCRIBED IN APPENDIX 5H. THE NUMBER OF ADDITIONAL WATER CONSERVATION MEASURES THAT MUST BE IMPLEMENTED DEPENDS ON THE TOTAL NUMBER OF SERVICE CONNECTIONS TO THE PROVIDER'S

WATER DISTRIBUTION SYSTEM. A PROVIDER WITH 5,000 OR FEWER SERVICE CONNECTIONS MUST IMPLEMENT ONE ADDITIONAL WATER CONSERVATION MEASURE; A PROVIDER WITH 5,001 TO 30,000 SERVICE CONNECTIONS MUST IMPLEMENT FIVE ADDITIONAL WATER CONSERVATION MEASURES; AND A PROVIDER WITH MORE THAN 30,000 SERVICE CONNECTIONS MUST IMPLEMENT TEN ADDITIONAL WATER CONSERVATION MEASURES. THE ADDITIONAL WATER CONSERVATION MEASURE OR MEASURES MUST BE SELECTED FROM THE LIST OF ADDITIONAL WATER CONSERVATION MEASURES IN APPENDIX 5H, OR ANY MODIFICATIONS OF THE LIST. ALL OF THE WATER CONSERVATION MEASURES SELECTED FOR IMPLEMENTATION MUST BE REASONABLY RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS.

AS STATED IN SECTION 5.7.1.2.1, A PROVIDER MUST IDENTIFY THE ADDITIONAL WATER CONSERVATION MEASURES IT INTENDS TO IMPLEMENT IN ITS PROVIDER PROFILE. ONCE THE PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, THE PROVIDER MUST IMPLEMENT THE WATER CONSERVATION MEASURES DESCRIBED BY THE PROVIDER IN THE APPROVED PROVIDER PROFILE WHILE THE PROVIDER IS REGULATED UNDER THE NPCCP. A PROVIDER MAY DISCONTINUE IMPLEMENTING A WATER CONSERVATION MEASURE IDENTIFIED IN ITS PROVIDER PROFILE, OTHER THAN THE PUBLIC EDUCATION PROGRAM, AND BEGIN IMPLEMENTING A SUBSTITUTE WATER CONSERVATION MEASURE IF BOTH OF THE FOLLOWING CRITERIA ARE MET:

- THE SUBSTITUTE WATER CONSERVATION MEASURE IS ON THE LIST OF ADDITIONAL WATER CONSERVATION MEASURES DESCRIBED IN APPENDIX 5H, OR ANY MODIFICATIONS OF THE LIST.
- THE PROVIDER DETERMINES THAT THE SUBSTITUTE WATER CONSERVATION MEASURE IS REASONABLY RELEVANT TO ITS EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS.

IF A PROVIDER BEGINS IMPLEMENTING A SUBSTITUTE WATER CONSERVATION MEASURE, THE PROVIDER MAY DISCONTINUE IMPLEMENTING THAT SUBSTITUTE MEASURE AND BEGIN IMPLEMENTING A NEW SUBSTITUTE MEASURE UNDER THE CRITERIA SET FORTH ABOVE. A PROVIDER THAT SUBSTITUTES A WATER CONSERVATION MEASURE MUST NOTIFY THE DIRECTOR OF THE SUBSTITUTION IN ITS NEXT CONSERVATION EFFORTS REPORT (SEE SECTION 5.7.1.2.3 BELOW). IF THE DIRECTOR DETERMINES THAT THE SUBSTITUTE WATER CONSERVATION MEASURE IS NOT REASONABLY RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS, IT WILL NOTIFY THE PROVIDER OF THE DETERMINATION AND THE PROVIDER MUST RESUME IMPLEMENTING THE DISCONTINUED WATER CONSERVATION MEASURE OR A SUBSTITUTE MEASURE THAT THE DIRECTOR APPROVES. THE DIRECTOR'S DETERMINATION IS AN APPEALABLE AGENCY ACTION.

5.7.1.2.3 CONSERVATION EFFORTS REPORT

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST INCLUDE WITH ITS ANNUAL REPORT FILED BY MARCH 31 OF EACH YEAR A CONSERVATION EFFORTS REPORT THAT INCLUDES THE FOLLOWING INFORMATION FOR THE PREVIOUS CALENDAR YEAR:

- A DESCRIPTION OF THE WATER CONSERVATION MEASURES IMPLEMENTED DURING THE YEAR.
- AN ASSESSMENT OF THE OUTCOMES OF THE IMPLEMENTATION OF EACH MEASURE.

- THE PROVIDER'S PLAN FOR IMPLEMENTATION OF WATER CONSERVATION MEASURES DURING THE CURRENT YEAR.
- IF THE PROVIDER SUBSTITUTED A WATER CONSERVATION MEASURE DURING THE YEAR, A DESCRIPTION OF THE WATER CONSERVATION MEASURE THAT WAS DISCONTINUED, A DESCRIPTION OF THE SUBSTITUTE WATER CONSERVATION MEASURE AND AN EXPLANATION OF HOW THE SUBSTITUTE WATER CONSERVATION MEASURE IS RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS.

5.7.1.2.4 WATER RATE STRUCTURE

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST INCLUDE IN ITS ANNUAL REPORT DUE BY MARCH 31 OF EACH YEAR A COPY OF ITS CURRENT WATER RATE STRUCTURE, UNLESS NO CHANGES HAVE BEEN MADE TO THE RATE STRUCTURE SINCE IT WAS LAST SUBMITTED TO THE DIRECTOR.

5.7.1.2.5 RECORDS RETENTION

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST KEEP AND MAINTAIN ACCURATE RECORDS VERIFYING THAT THE PROVIDER IMPLEMENTED THE WATER CONSERVATION MEASURES THAT IT WAS REQUIRED TO IMPLEMENT DURING A YEAR AND RECORDS OF ITS WATER USE DURING THE YEAR. THE RECORDS FOR A YEAR MUST BE KEPT AND MAINTAINED FOR AT LEAST FIVE YEARS AFTER THAT YEAR.

5.7.1.2.6 INDIVIDUAL USER REQUIREMENTS, DISTRIBUTION SYSTEM REQUIREMENTS AND MONITORING AND REPORTING REQUIREMENTS

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST COMPLY WITH THE INDIVIDUAL USER REQUIREMENTS IN SECTION 5-111, THE CONSERVATION REQUIREMENTS FOR MUNICIPAL DISTRIBUTIONS SYSTEMS IN SECTION 5-112 AND THE MONITORING AND REPORTING REQUIREMENTS IN SECTION 5-113.

5.7.1.2.7 REVIEW OF NPCCP

THE LEGISLATION REQUIRING THE DIRECTOR TO MODIFY THE THIRD MANAGEMENT PLAN TO INCLUDE THE NEW NPCCP REQUIRES THE DIRECTOR TO PERIODICALLY REVIEW THE PROGRAM TO EVALUATE ITS EFFECTIVENESS, INCLUDING THE LIST OF WATER CONSERVATION MEASURES APPROVED BY THE DIRECTOR. THE LEGISLATION AUTHORIZES THE DIRECTOR TO ESTABLISH AN ADVISORY COMMITTEE TO ASSIST THE DIRECTOR IN THE EVALUATION AND TO CONTRACT WITH AN INDEPENDENT RESEARCHER TO ASSIST IN THE EVALUATION. THE LEGISLATION PROVIDES THAT IF THE DIRECTOR DETERMINES THAT CHANGES TO THE PROGRAM ARE APPROPRIATE TO IMPROVE THE EFFECTIVENESS OF THE PROGRAM, THE DIRECTOR SHALL MODIFY THE PROGRAM PURSUANT TO A.R.S. § 45-572 IF THE CHANGES ARE CONSISTENT WITH THE EXISTING STATUTORY PROVISIONS. IF THE CHANGES THAT THE DIRECTOR DETERMINES ARE APPROPRIATE ARE NOT CONSISTENT WITH THE EXISTING STATUTORY PROVISIONS, THE DIRECTOR MUST GIVE WRITTEN NOTICE OF THE APPROPRIATE CHANGES TO THE SPEAKER OF THE HOUSE OF REPRESENTATIVES, THE PRESIDENT OF THE SENATE AND THE GOVERNOR. THE DIRECTOR INTENDS TO EVALUATE THE EFFECTIVENESS OF THE NPCCP AS PART OF THE FOURTH MANAGEMENT PLAN DEVELOPMENT PROCESS. THE DEPARTMENT WILL ESTABLISH AN ADVISORY COMMITTEE CONSISTING OF STAKEHOLDERS TO ASSIST IN THE EVALUATION.

5.7.1.3 Alternative Conservation Program

The ACP was developed for the Second Management Plan to give large municipal providers with disproportionately increasing non-residential water use an alternative to the Total GPCD Program. The ACP allows providers with disproportionately increasing non-residential water use the flexibility to serve those non-residential uses while achieving water use efficiency levels comparable to those set by the Total GPCD Program. THE ACP IS AVAILABLE ONLY FOR LARGE MUNICIPAL PROVIDERS THAT HAVE BEEN DESIGNATED AS HAVING AN ASSURED WATER SUPPLY. The ACP consists of the following requirements that must be met by the provider:

(1) groundwater use limitation, (2) residential GPCD requirement, and (3) non-residential RCMs.

5.7.1.3.1 Groundwater Use Limitation Requirement

~~A provider regulated under the ACP must limit its annual groundwater use as follows: (1) If the provider is designated as having an assured water supply, it must limit its annual groundwater use to the amount it can use consistent with the AWS Rules; (2) If the provider is not designated as having an assured water supply, it must limit its annual groundwater use to its largest legal groundwater use during any one year from 1980 through 1989 if it was serving water on or before January 1, 1990, or to 50 percent of the largest legal groundwater use during any one year from January 1, 1990 through 1999 if it began serving water after January 1, 1990 but before January 1, 2000. A provider can achieve compliance with the groundwater use limitation requirement by permanently extinguishing grandfathered rights within the AMA, or by serving groundwater that will be replenished by a replenishment district, remediated groundwater that is accounted for as surface water under section 5-114 of the municipal conservation requirements, groundwater withdrawn outside of an AMA, or renewable supplies.~~

5.7.1.3.2 Residential Gallons Per Capita Per Day Requirement

[No change]

5.7.1.3.3 Non-Residential Reasonable Conservation Measures

[No change]

5.7.1.3.4 Compliance with the Alternative Conservation Program

[No change]

5.7.1.3.4.1 Groundwater Use Limitation

A provider regulated under the ACP is in compliance with the groundwater use limitation requirement of the ACP if no more groundwater is used in the calendar year than is allowed pursuant to the provisions of the program.

5.7.1.3.4.2 Residential Gallons Per Capita Per Day Requirement

[No change]

5.7.1.3.4.3 Non-Residential Reasonable Conservation Measures

[No change]

5.7.1.4 Institutional Provider Program

The IPP replaced the First Management Plan special provider category. The IPP allows those providers with unique water use characteristics who are unable to economically utilize non-groundwater sources an avenue to participate in a program that focuses on the specific institutional water use characteristics of the service area. The IPP is designed for municipal providers who supply more than 90 percent of their total water deliveries to non-residential water users. Specifically, these non-residential uses include prisons, hospitals, military installations, airparks, and schools. Providers may request entrance into this program by submitting an application to the director at any time during the management period. If the request is approved, the provider will be assigned specific conservation measures for non-residential uses and a maximum residential GPCD. The Department will grant institutional provider designation only if the Total GPCD Program is not appropriate and the provider demonstrates that it cannot qualify for the ACP or the NPCCP ~~by limiting its groundwater use, retiring grandfathered water rights, or using alternative sources of water.~~

5.7.2 Conservation Requirements for New Large Municipal Providers

A new large municipal provider is defined as a city, town, private water company, or irrigation district that begins serving more than 250 acre-feet of water for non-irrigation use per year after January 1, 2000. All new large providers THAT ARE DESIGNATED AS HAVING AN ASSURED WATER SUPPLY will initially be assigned to the Total GPCD Program. Their total GPCD requirement will be calculated consistent with the component methodology used for existing large municipal providers. The Department will determine the base year for the municipal provider as the year preceding the year in which the provider began serving greater than 250 acre-feet per year, unless the director determines that water usage during that year is not representative of historic water use. Additionally, the Department will collect residential and non-residential water use data during the base year and the total gallons of water withdrawn, diverted, or received by the provider in the service area. Using an analysis of conservation potential for existing residential users, the Department will calculate a GPCD requirement for existing residential users. New residential development will be assigned the interior residential model use rates of 57 GPCD for new single family and multifamily water users and the exterior water use model of 75 GPHUD for new single family and 58 GPHUD for new multifamily exterior water use. The non-residential component rate will be set at the actual non-residential use up to 20 GPCD. The 20 GPCD figure is based on the average, minimum non-residential per capita rate in large municipal water provider service areas without large turf-related facilities in the AMAs. Twenty GPCD is considered the minimum amount of non-residential use necessary for commercial purposes within a large provider service area. Any non-residential demand above this rate can be accommodated by either the ACP or the NPCCP. The annual amount of lost and unaccounted for water will be included in the component calculation up to 10 percent of the total water use in that year.

A new large provider REGULATED UNDER THE TOTAL GPCD PROGRAM may apply for an administrative review requesting a temporary adjustment to its total GPCD requirement in order to serve a turf-related facility. A temporary adjustment will be allowed if the provider demonstrates that direct use effluent or effluent recovered within the area of impact is committed to serve the turf-related facility beginning in four years, but a longer period is necessary for sufficient effluent to be produced to serve the entire facility. The adjustment will remain in effect only until sufficient direct use effluent or effluent recovered within the area of impact is available to serve the entire facility, not to exceed eight years, and may be adjusted as the volume of effluent use increases. The adjustment will be terminated if the infrastructure necessary to deliver the effluent is not in place at the beginning of the fourth year after the provider commences service to the facility. A permanent adjustment will not be granted to a new large municipal provider. If a new large municipal provider THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY cannot serve a turf-related facility under its existing per capita requirement and direct use effluent or effluent recovered within the area of impact will not be physically available to

serve the facility within a reasonable period of time, the provider may enroll in the Non-Per Capita Conservation Program or the Alternative Conservation Program, if it wishes to serve the facility.

A NEW LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY WILL BE REGULATED UNDER THE NPCCP DESCRIBED IN SECTION 5-104. THE PROVIDER MUST SUBMIT A PROVIDER PROFILE CONTAINING THE INFORMATION DESCRIBED IN SECTION 5-104(B)(1) BY JULY 1, 2009 OR WITHIN SIX MONTHS AFTER RECEIVING WRITTEN NOTICE OF ITS CONSERVATION REQUIREMENTS FROM THE DIRECTOR, WHICHEVER IS LATER. THE PROVIDER MUST BEGIN COMPLYING WITH THE NPCCP UPON APPROVAL OF THE PROVIDER'S PROVIDER PROFILE PURSUANT TO SECTION 5-104(B)(2) OR (B)(3).

5.7.3 Conservation Requirements for Consolidated Municipal Providers and Providers that Acquire or Convey a Portion of a Service Area

~~If two or more municipal providers consolidate their service areas or if a large municipal provider acquires a portion of another provider's service area, the consolidated provider, acquiring provider, or conveying provider will receive a recalculated or revised conservation requirement. A consolidated provider that qualifies as a large municipal provider will be assigned to the Total GPCD Program and its GPCD components will be calculated by prorating the respective per capita component targets, populations, and water use as appropriate. A consolidated provider may apply for the NPCCP or the ACP if one of the consolidated providers was regulated under one of these programs prior to the consolidation. The consolidated provider's application for the program must include only the information that has changed since the provider originally filed the application for the program. Providers that acquire or convey a portion of a service area continue to be regulated under the conservation program they were under prior to the acquisition or conveyance. However, if they were regulated under either they must reapply for regulation under that program within 180 days after the acquisition or conveyance and must submit only the information that has changed since the original application was filed.~~

IF TWO OR MORE MUNICIPAL PROVIDERS CONSOLIDATE THEIR SERVICE AREAS OR IF A LARGE MUNICIPAL PROVIDER ACQUIRES A PORTION OF ANOTHER PROVIDER'S SERVICE AREA, THE CONSOLIDATED PROVIDER, ACQUIRING PROVIDER, OR CONVEYING PROVIDER WILL RECEIVE A RECALCULATED OR REVISED CONSERVATION REQUIREMENT. A CONSOLIDATED PROVIDER THAT QUALIFIES AS A LARGE MUNICIPAL PROVIDER WILL BE REGULATED AS FOLLOWS:

- IF THE CONSOLIDATED PROVIDER IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY, IT WILL BE ASSIGNED TO THE TOTAL GPCD PROGRAM AND ITS GPCD COMPONENTS WILL BE CALCULATED BY PRORATING THE RESPECTIVE PER CAPITA COMPONENT TARGETS, POPULATIONS, AND WATER USE AS APPROPRIATE. THE CONSOLIDATED PROVIDER MAY APPLY FOR THE ACP OR MAY ELECT TO BE REGULATED UNDER THE NPCCP.
- IF THE CONSOLIDATED PROVIDER IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY, THE PROVIDER MUST SUBMIT TO THE DIRECTOR A PROVIDER PROFILE AS DESCRIBED IN SECTION 5-104(B)(1) WITHIN 60 DAYS AFTER THE CONSOLIDATION BECOMES EFFECTIVE OR JULY 1, 2009, WHICHEVER IS LATER. THE CONSOLIDATED PROVIDER WILL BE REGULATED UNDER THE NPCCP DESCRIBED IN SECTION 5-104 UPON APPROVAL OF THE PROVIDER PROFILE BY THE DIRECTOR.

PROVIDERS THAT ACQUIRE OR CONVEY A PORTION OF A SERVICE AREA CONTINUE TO BE REGULATED UNDER THE CONSERVATION PROGRAM THEY WERE UNDER PRIOR TO

THE ACQUISITION OR CONVEYANCE. HOWEVER, IF THE CONVEYING OR ACQUIRING PROVIDER IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND WAS REGULATED UNDER THE ACP, IT MUST REAPPLY FOR REGULATION UNDER THAT PROGRAM WITHIN 180 DAYS AFTER THE ACQUISITION OR CONVEYANCE AND MUST SUBMIT ONLY THE INFORMATION THAT HAS CHANGED SINCE THE ORIGINAL APPLICATION WAS FILED. ALSO, IF THE CONVEYANCE OCCURS ON OR AFTER JANUARY 1, 2010 AND THE CONVEYING OR ACQUIRING PROVIDER IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AFTER THE CONVEYANCE OR ACQUISITION, IT WILL BE REGULATED UNDER THE NPCCP REGARDLESS OF WHETHER IT WAS REGULATED UNDER THAT PROGRAM PRIOR TO THE CONVEYANCE OR ACQUISITION. IF THE CONVEYING OR ACQUIRING PROVIDER IS REGULATED UNDER THE NPCCP AFTER THE CONVEYANCE OR ACQUISITION AND IT WAS REGULATED UNDER THAT PROGRAM IMMEDIATELY PRIOR TO THE CONVEYANCE OR ACQUISITION, THE PROVIDER MUST SUBMIT A NEW PROVIDER PROFILE TO THE DIRECTOR IF EITHER: (1) THE CONVEYANCE OR ACQUISITION RESULTED IN THE TOTAL NUMBER OF SERVICE AREA CONNECTIONS TO THE PROVIDER'S WATER DISTRIBUTION SYSTEM INCREASING OR DECREASING TO A NEW TIER LEVEL; OR (2) THE DIRECTOR DETERMINES THAT THE PROVIDER'S SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS HAVE CHANGED.

5.7.5 Regulatory Requirements for All Municipal Providers

[No change]

5.7.5.1 Individual User Requirements

[No change]

5.7.5.2 Distribution System Requirements

[No change]

5.7.5.3 Monitoring and Reporting Requirements

All municipal providers are required to annually: (1) report to the Department information on the total quantity of water used within the service area and the total volume of water delivered for various municipal purposes, (2) calculate the volume of lost and unaccounted for water within the service area, and (3) report the total number of housing units, by unit type, added to the service area from July 1 of the previous calendar year to July 1 of the reporting year.

Large municipal providers are required to separately measure and report the amount of water delivered each month for: irrigation uses; residential uses, separated by single family and multifamily; and non-residential uses, separated by water use categories, including turf-related facility use, commercial use, industrial use, government use, construction use, surface water treatment, and other uses.

All municipal providers are required to submit to the Department, on an annual basis, an updated water service area and distribution system map delineating all potable and nonpotable distribution lines greater than 4 inches, all potable treatment facilities, all well sites, and all nonpotable treatment.

Large municipal providers regulated under the NPCCP or the ACP are required to submit a progress report that includes an evaluation of the reasonable conservation measures in accordance with their written stipulated agreement. A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST SUBMIT A CONSERVATION EFFORTS REPORT AS DESCRIBED IN SECTION 5-104(E) AND MUST REPORT THE TOTAL NUMBER OF SERVICE CONNECTIONS TO THE PROVIDER'S WATER DISTRIBUTION SYSTEM AS OF THE END OF THE REPORTING YEAR.

5.10 SUMMARY AND CONCLUSIONS

The Third Management Plan Municipal Program includes conservation requirements for large municipal providers and small municipal providers. Large municipal providers are noticed of conservation requirement components for existing residential water use, new residential water use, non-residential water use, and lost and unaccounted for water use for the third management period. The components are used to calculate a total GPCD requirement for each calendar year based on growth within the large municipal provider's water service area. Large municipal providers DESIGNATED AS HAVING AN ASSURED WATER SUPPLY may also apply for the ACP or ENROLL IN the NPCCP if non-residential growth within the water service area occurs disproportionately to residential growth. Both of these alternative conservation programs require a limitation or reduction in the provider's use of groundwater in order to qualify. Small municipal providers are essentially required to reduce waste and improve water use efficiency within their water service areas during the third management period.

AS A RESULT OF LEGISLATION ENACTED IN 2007, THE NON-PER CAPITA CONSERVATION PROGRAM INITIALLY INCLUDED IN THE THIRD MANAGEMENT PLAN HAS BEEN MODIFIED IN SEVERAL RESPECTS. AS REQUIRED BY THE LEGISLATION, ALL LARGE MUNICIPAL PROVIDERS THAT ARE NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ARE NOT REGULATED AS INSTITUTIONAL PROVIDERS WILL BE REGULATED UNDER THE PROGRAM BEGINNING JANUARY 1, 2010 OR THE DATE THEIR PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, WHICHEVER IS LATER. LARGE MUNICIPAL PROVIDERS THAT HAVE BEEN DESIGNATED AS HAVING AN ASSURED WATER SUPPLY ARE NOT REQUIRED TO BE REGULATED UNDER THE NON-PER CAPITA CONSERVATION PROGRAM, BUT THEY MAY ELECT TO BE REGULATED UNDER THAT PROGRAM AS AN ALTERNATIVE TO THE TOTAL GPCD PROGRAM. PROVIDERS REGULATED UNDER THE NON-PER CAPITA CONSERVATION PROGRAM MUST IMPLEMENT A REQUIRED NUMBER OF WATER CONSERVATION MEASURES WITHIN THEIR SERVICE AREA. THE REQUIREMENT TO LIMIT GROUNDWATER USE TO A SPECIFIED VOLUME HAS BEEN ELIMINATED.

All municipal providers must comply with monitoring and distribution system requirements. Information on water use, growth, and system losses, for example, must be reported to the Department on an annual basis.

~~Many regulatory program and water management issues were raised by the Department and municipal providers during the development of the Third Management Plan. These issues include: the difficulties~~

~~private water companies experience in implementing conservation programs and transitioning to the use of renewable water supplies; difficulties encountered with the use of a total GPCD requirement to regulate water use efficiency; the potential for and challenges of utilization of additional renewable supplies; and the relationship of the municipal sector to the achievement of the AMA goals. Addressing these issues may require additional legislation and management plan modifications during the third management period. Cooperation between the Department and municipal providers will result in solutions to these issues that improve water management within the AMA and lead to improved efficiency of use in the municipal sector.~~

5.11 FUTURE DIRECTIONS

A priority for the early years of the third management period will be working with municipal providers and communities throughout the AMA on short and long term water planning. Department staff will work with other parties to collect further hydrologic data and to expand the groundwater and surface water monitoring system. These additional data will be used to further refine the Department's hydrologic model and to work cooperatively with water providers to analyze alternative water supply scenarios.

Throughout the third management period, the Department will work to improve data collection on water demands and conservation measures. Additional analyses of municipal growth patterns will be performed. The Department will continue to collect information on the best available technologies for residential and non-residential water use. The Department will continue to quantify what a reasonable goal is for future reductions in municipal water use.

The relative contributions of conservation versus augmentation of water supplies to the goal of safe-yield will be evaluated. The effectiveness of conservation programs and the extent to which increasing efficiency of use can contribute to the overall goals of the AMA will also be evaluated. This may include focusing the conservation assistance program on municipal research or evaluation projects or increasing direct assistance to providers.

~~The Department will continue to explore the possibility of developing a separate Private Water Company Program during the third management period.~~ Through discussions with the ACC, the Department will continue to develop policies related to water conservation and supply acquisition and foster an understanding with the ACC on a private water company conservation program and the ability to provide more assurance on the pass-through of costs associated with the required programs established by the Department.

~~A. Eligibility for the Non-Per Capita Conservation Program~~

~~A large municipal provider may apply for the Non-Per Capita Conservation Program if any of the following applies:~~

- ~~1. The provider is a member of a groundwater replenishment district established under Title 48, Chapter 27, Arizona Revised Statutes.~~
- ~~2. The service area of the provider has qualified as a member service area under Title 48, Chapter 22, Arizona Revised Statutes, or as a water district member under Title 48, Chapter 28, Arizona Revised Statutes, and the conditions established under A.R.S. § 45-576.01(B)(2) and (3) are met by the conservation district or the water district, as applicable, for the AMA in which the service area is located.~~
- ~~3. The provider has developed a plan to both:~~
 - ~~a. Reduce the proportion of mined groundwater supplied by it for use within its service area such that the result computed by dividing the volume of mined groundwater supplied by the provider for use within its service area in a year by the volume of all water supplied by the provider for use within its service area in that year does not exceed:~~
 - ~~1) Two-thirds for 2000.~~
 - ~~2) Three-fifths for 2001.~~

~~A large municipal provider's application for the Non-Per Capita Conservation Program must be approved by the provider's governing body, and must include the following:~~

- ~~1. A description and evaluation, including implementation dates, of the provider's existing conservation programs.~~
- ~~2. A description of conservation programs the provider intends to implement if approved for the Non-Per Capita Conservation Program, including a time schedule for implementing the programs.~~
- ~~3. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 3, a water supply plan demonstrating that the provider will reduce the proportion of mined groundwater supplied by it within its service area to the proportions described in that subparagraph, and that it will deliver no mined groundwater after January 1, 2010.~~
- ~~4. If the provider intends to comply with subsection D of this section by implementing one or more substitute RCMs in lieu of a standard RCM, or if the provider requests the director to modify a level of conservation potential for the provider's service area pursuant to subsection D, paragraph 1, subparagraph a of this section, an analysis of water use within the provider's service area which includes all of the following:~~
 - ~~a. If the provider intends to implement one or more substitute RCMs, from either the same water use category or as a system related substitute RCM, information demonstrating that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area equivalent to the efficiency that would result from implementation of the standard RCM or RCMs. If the provider intends to implement one or more substitute RCMs that are not from the same water use category or system related substitute RCMs, information demonstrating that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area that is greater than the efficiency that would result from the implementation of the standard RCM or RCMs.~~

~~5. If the provider is requesting an individual incidental recharge factor under subsection C, paragraph 2 of this section:~~

~~a. A copy of a hydrological study which demonstrates the amount of water withdrawn, diverted or received for delivery by the provider for use within its service area during each of the preceding five years and the amount of incidental recharge that was attributable to the provider during those years. The study shall be prepared consistent with the methodology contained in Appendix 5E.~~

~~b. A copy of a hydrological study projecting the average annual amount of water that will be withdrawn, diverted or received for delivery by the provider for use within its service area during the management period and the average annual amount of incidental recharge that will be attributable to the provider during the management period.~~

~~6. Any other information required by the director.~~

~~C. Incidental Recharge Factor~~

~~1. Standard Incidental Recharge Factor~~

~~The standard incidental recharge factor for the Prescott AMA for the third management period is zero percent (0%). The standard incidental recharge factor shall be used to calculate the amount of mined groundwater supplied during a year by a large municipal provider that applied for the Non-Per Capita Conservation Program under subsection A, paragraph 3 of this section, unless the provider applies for and is granted an individual incidental recharge factor pursuant to paragraph 2 of this subsection.~~

~~2. Individual Incidental Recharge Factor~~

~~A municipal provider that applies for the Non-Per Capita Conservation Program under subsection A, paragraph 3 of this section may request an incidental recharge factor that is different than the standard incidental recharge factor set forth in paragraph 1 of this subsection by submitting the information described in subsection B, paragraph 5 of this section with its application. The director shall establish a different incidental recharge factor for the provider, as described in Appendix 5E, if the information submitted by the provider demonstrates that the ratio of the average annual amount of incidental recharge expected to occur within the provider's service area during the third management period to the average annual amount of water expected to be supplied by the provider for use within its service area during the third management period is different than the standard incidental recharge factor. If the director establishes an individual incidental recharge factor for the provider under this paragraph, the individual incidental recharge factor shall be used to calculate the amount of mined groundwater supplied by the provider during a year.~~

~~D. Criteria for Approval of Application~~

~~A large municipal provider that applies for the Non-Per Capita Conservation Program shall be approved for the program only if all of the following conditions are satisfied, as applicable:~~

~~1. The provider agrees in writing to implement RCMs that the director determines will, if properly implemented, result in the achievement of a water use efficiency within the provider's service area equivalent to the water use efficiency assumed in the provider's total GPCD requirements for the third management period. To comply with this requirement, the provider must agree in writing to implement the following RCMs for the following water use categories and programs beginning on a date agreed upon by the director and the provider:~~

~~a. Residential Water Use~~

~~1) Residential interior water use category The provider shall agree in writing to implement the residential interior standard RCMs described in Appendix 5D.1. In lieu of implementing one or both of the standard RCMs, the provider may agree to implement: A) one or more of the residential interior substitute RCMs or system-related substitute RCMs listed in the substitute RCM list described in Appendix 5D.4 if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area equivalent to the efficiency that would result from implementation of the standard RCM or RCMs; or B) one or more substitute RCMs that are not residential interior substitute RCMs or system-related substitute RCMs if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area that is greater than the efficiency that would result from the implementation of the standard RCM or RCMs. The director shall not approve a substitution of the standard residential interior water use RCMs if the substitution would result in the provider implementing no RCMs in the residential interior water use category.~~

~~2) Residential exterior water use category The provider shall agree in writing to implement the residential exterior standard RCMs described in Appendix 5D.1. In lieu of implementing one or more of the standard RCMs, the provider may agree to implement: A) one or more of the residential exterior substitute RCMs or system-related substitute RCMs listed in the substitute RCM list described in Appendix 5D.4 if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area equivalent to the efficiency that would result from implementation of the standard RCM or RCMs; or B) one or more substitute RCMs that are not residential exterior substitute RCMs or system-related substitute RCMs if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area that is greater than the efficiency that would result from the implementation of the standard RCM or RCMs. The director shall not approve a substitution of the standard residential exterior water use RCMs if the substitution would result in the provider implementing no RCMs in the residential exterior water use category.~~

~~3) Implementation level The provider shall agree to implement residential interior or exterior RCMs for existing residential customers at the implementation level~~

~~(minimum, moderate or maximum) that corresponds to the level of conservation potential that the director determined existed for interior and exterior water use by existing residential users within the provider's service area when the director established the provider's total GPCD requirements for the third management period, as shown in Table 5-104.D.~~

~~The director may modify a level of conservation potential shown for a provider in Table 5-104.D if the provider requests a modification in an application for administrative review pursuant to A.R.S. § 45-575(A) or in the provider's application for regulation under the Non-Per Capita Conservation Program, and the provider demonstrates that the level of conservation potential shown in Table 5-104.D is not accurate for the provider's service area. A provider requesting a modification of a level of conservation potential shall submit to the director a water use analysis containing the information described in subsection B, paragraph 4, of this section.~~

~~b. Non-Residential Water Use~~

- ~~1) Non-residential interior water use category The provider shall agree in writing to implement the non-residential interior standard RCMs described in Appendix 5D.2. In lieu of implementing one or more of the standard RCMs, the provider may agree to implement: A) one or more of the non-residential interior substitute RCMs or system-related RCMs listed in the substitute RCM list described in Appendix 5D.4 if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area equivalent to the efficiency that would result from implementation of the standard RCM or RCMs; or B) one or more substitute RCMs that are not non-residential interior substitute RCMs or system-related substitute RCMs if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area that is greater than the efficiency that would result from the implementation of the standard RCM or RCMs. The director shall not approve a substitution of the standard non-residential interior water use RCMs if the substitution would result in the provider implementing no RCMs in the non-residential interior water use category.~~
- ~~2) Non-residential exterior water use category The provider shall agree in writing to implement the non-residential exterior standard RCMs described in Appendix 5D.2. In lieu of implementing one or both of the standard RCMs, the provider may agree to implement: A) one or more of the non-residential exterior substitute RCMs or system-related RCMs listed in the substitute RCM list described in Appendix 5D.4 if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area~~

~~equivalent to the efficiency that would result from implementation of the standard RCM or RCMs; or B) one or more substitute RCMs that are not non-residential exterior substitute RCMs or system-related substitute RCMs if the director determines that the substitute RCM or RCMs will be designed to achieve a water-use efficiency within the provider's service area that is greater than the efficiency that would result from the implementation of the standard RCM or RCMs. The director shall not approve a substitution of the standard non-residential exterior water-use RCMs if the substitution would result in the provider implementing no RCMs in the non-residential exterior water-use category.~~

~~c. Public Education Program~~

~~The provider shall agree in writing to implement the education standard RCM described in Appendix 5D.3. In lieu of implementing the standard RCM, the provider may agree to implement one or more of the education substitute RCMs listed in the substitute RCM list described in Appendix 5D.4. The substituted RCM or RCMs must not duplicate other RCMs that the provider will implement as part of the Non-Per Capita Conservation Program.~~

- ~~2. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 1 of this section, the provider will be accepted into the program only if the conditions established in A.R.S. § 45-576.01(A)(2) and (3) are met by the groundwater replenishment district of which the provider is a member.~~
- ~~3. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 2 of this section, the provider will be accepted into the program only if the conditions established in A.R.S. § 45-576.01(B)(2) and (3) are met for the AMA by the multi-county water conservation district or AMA water district of which the provider is a member.~~
- ~~4. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 3 of this section, the provider will be accepted into the program only if the director has determined that the provider will reduce the proportion of mined groundwater supplied within its service area to the proportions described in that subparagraph.~~
- ~~5. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 4 of this section, the provider will be accepted into the program only if the director determines that the provider is designated as having an assured water supply under the rules adopted by the director under A.R.S. § 45-576.~~

~~E. Non-Per Capita Conservation Program Requirements~~

~~A large municipal provider regulated under the Non-Per Capita Conservation Program shall comply with the following requirements, as applicable, until the effective date of any substitute conservation requirements established in the Fourth Management Plan:~~

- ~~1. The provider shall implement the RCMs agreed to in writing under subsection D, paragraph 1 of this section beginning on a date agreed upon by the director and the provider.~~

- ~~2. If the provider applied for the Non-Per Capita Conservation Program under subsection A, paragraph 3 of this section, the provider shall reduce the proportion of mined groundwater supplied within its service area to the proportions described in that paragraph. A provider's failure to comply with this requirement during any year will be excused if the provider demonstrates to the director's satisfaction that the failure was due to drought conditions or the failure of a surface water distribution system.~~
- ~~3. If the provider applied for the Non-Per Capita Conservation Program under subsection A, paragraph 4 of this section, the provider shall not supply groundwater for use within its service area in an amount that exceeds the amount of groundwater that the provider may supply for use within its service area consistent with the rules adopted by the director pursuant to A.R.S. § 45-576. If the provider's designation of assured water supply is revoked or otherwise terminates after the provider is accepted into the program, the amount of groundwater the provider may supply for use within its service area consistent with the rules shall be determined by the director as the amount of groundwater the provider would have been allowed to supply under the rules if the provider's designation of assured water supply had not been revoked or terminated.~~

 - ~~2) If the provider is not designated as having an assured water supply under the rules adopted by the director pursuant to A.R.S. § 45-576, one of the following, as applicable:

 - ~~a) If the provider was serving water as a large municipal provider on or before January 1, 1990, the provider's largest legal groundwater use during any one calendar year from calendar year 1980 through calendar year 1989.~~
 - ~~b) If the provider began serving water as a large municipal provider after January 1, 1990 but before January 1, 2000, fifty percent of the provider's largest legal groundwater use during any one calendar year from January 1, 1990 through calendar year 1999.~~~~
- ~~b. The large municipal provider may achieve compliance with the groundwater use limitation requirement described in subparagraph a, item 2 of this paragraph by permanently extinguishing or causing to be permanently extinguished grandfathered rights to groundwater as described in subparagraph c of this paragraph, by serving groundwater that will be replenished by a conservation district pursuant to Title 48, Chapter 22, Arizona Revised Statutes, by using remediated groundwater that is consistent with the accounting for surface water as provided in section 5-114, or by substituting non-groundwater supplies or groundwater withdrawn from outside the active management area for groundwater withdrawn from within the active management area, or by a combination of these methods.~~
- ~~c. Extinguishment of Groundwater Uses Associated with Grandfathered Rights~~

~~1) Applicability~~

~~Only irrigation grandfathered rights, Type 1 non-irrigation grandfathered rights and Type 2 non-irrigation grandfathered rights, as described in A.R.S. §§ 45-462 through 45-465, may be extinguished to meet the groundwater use limitation requirement. The large municipal provider shall not receive credit toward the achievement of the groundwater use limitation requirement for the extinguishment of either a Type 2 non-irrigation grandfathered right used for electrical energy generation or mineral extraction or processing purposes, or a Type 1 or Type 2 non-irrigation grandfathered right owned or previously owned by a municipal provider and used or previously used to serve the municipal provider's service area.~~

~~2) Annual Credits~~

~~The director shall determine the amount of annual credit a large municipal provider obtains for extinguishment of grandfathered rights to groundwater as follows:~~

- ~~a) For each irrigation grandfathered right extinguished or caused to be extinguished by the provider, the annual credit shall be the amount calculated by multiplying 1.5 acre-feet per acre by the number of water duty acres associated with the extinguishment, less any debits, in acre-feet, in the farm's operating flexibility account at the time the right is extinguished.~~
- ~~b) For each Type 1 non-irrigation grandfathered right or portion of such right extinguished or caused to be extinguished by the provider, the annual credit shall be the amount calculated by multiplying 1.5 acre-feet per acre by the number of acres to which the Type 1 non-irrigation grandfathered right is appurtenant, or a proportional amount thereof if only a portion of the right is extinguished.~~
- ~~c) For each Type 2 non-irrigation grandfathered right extinguished or caused to be extinguished by the provider, the annual credit shall be the full amount, in acre-feet, of the certificated Type 2 non-irrigation grandfathered right.~~

~~3) Proof of Extinguishment~~

~~In order for a large municipal provider to obtain an annual credit for extinguishing or causing to be extinguished a grandfathered right to groundwater, the holder of the grandfathered right must deliver the Certificate of Grandfathered Right to the director before the calendar year in which the credit will be used, request that the grandfathered right be extinguished, and direct that the provider receive the annual credit. Only one provider may receive annual credit for any one portion of a grandfathered right which has been extinguished.~~

~~d. Compliance~~

~~The director shall determine whether a large municipal provider is in compliance with its groundwater use limitation requirement, as described in subparagraph a, item 2) of this paragraph in a calendar year as follows:~~

- ~~1) Add together the amount of annual credits received by the provider for extinguishing grandfathered rights to groundwater after January 1, 1990 pursuant to subparagraph c of this paragraph and pursuant to the Alternative Conservation Program in the second management plan.~~
- ~~2) Calculate the total volume of groundwater, in acre-feet, which the provider withdrew, diverted or received during the calendar year for use within the provider's service area. In making this calculation, the director shall not include any groundwater that a conservation district replenished or is obligated to replenish under Title 48, Chapter 22, Arizona Revised Statutes or any remediated groundwater qualifying under section 5-114.~~
- ~~3) Subtract the amount calculated in item 1) above from the volume calculated in item 2) above.~~
- ~~4) A provider is in compliance with its groundwater use limitation requirement if the amount calculated in item 3) of this subparagraph is equal to or less than the following, as applicable:
 - ~~a) If the provider was serving water as a large municipal provider on or before January 1, 1990, the provider's largest legal groundwater use during any one calendar year from calendar year 1980 through calendar year 1989.~~
 - ~~b) If the provider began serving water as a large municipal provider after January 1, 1990 but before January 1, 2000, 50 percent of the provider's largest legal groundwater use during any one calendar year from January 1, 1989 through calendar year 1999.~~~~

I. PUBLIC EDUCATION PROGRAM

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NON-PER CAPITA CONSERVATION PROGRAM DESCRIBED IN SECTION 5-104 SHALL IMPLEMENT A PUBLIC EDUCATION PROGRAM THAT INCLUDES THE FOLLOWING COMPONENTS:

1. AT LEAST TWICE A YEAR, THE PROVIDER SHALL COMMUNICATE TO CUSTOMERS THE IMPORTANCE OF WATER CONSERVATION AND INFORM THEM OF THE KIND OF INFORMATION THAT IS AVAILABLE TO THEM FROM THE PROVIDER REGARDING WATER CONSERVATION HOW THEY CAN OBTAIN THE INFORMATION. COMMUNICATION CHANNELS SHALL INCLUDE ONE OR MORE OF THE FOLLOWING: WATER BILL INSERTS, MESSAGES ON WATER BILLS, PROVIDER WEB PAGE, POST CARDS, NEWSLETTERS OR PRINT PIECES. 2. THE PROVIDER SHALL PROVIDE CUSTOMERS WITH FREE WRITTEN INFORMATION ON WATER CONSERVATION (I.E., PAMPHLETS, BROCHURES). THE INFORMATION SHALL BE AVAILABLE IN THE PROVIDER'S OFFICE AND THE PROVIDER SHALL SEND INFORMATION TO CUSTOMERS ON REQUEST. THE PROVIDER IS ENCOURAGED TO DISTRIBUTE WATER CONSERVATION INFORMATION AT OTHER LOCATIONS AS WELL.

II. ADDITIONAL WATER CONSERVATION MEASURES

THE FOLLOWING IS A LIST OF ADDITIONAL WATER CONSERVATION MEASURES THAT A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NON-PER CAPITA CONSERVATION PROGRAM DESCRIBED IN SECTION 5-104 MUST SELECT FROM TO COMPLY WITH THE PROGRAM. THE DIRECTOR MAY MODIFY THE LIST TO INCLUDE ADDITIONAL WATER CONSERVATION MEASURES PURSUANT TO THE PROCEDURE SET FORTH AT THE END OF THIS APPENDIX. A COPY OF THE MOST RECENT THE LIST OF ADDITIONAL WATER CONSERVATION MEASURES SHALL BE POSTED ON THE DEPARTMENT'S WEB SITE AND SHALL BE ON FILE IN THE PRESCOTT ACTIVE MANAGEMENT AREA OFFICE.

CATEGORY 1: PUBLIC AWARENESS/PUBLIC RELATIONS

PROGRAMS IN THIS CATEGORY ARE DESIGNED TO PROVIDE WATER USERS INFORMATION ON THE NEED FOR AND IMPORTANCE OF WATER CONSERVATION, AS WELL AS INFORMATION ON THE CONSERVATION SERVICES AVAILABLE TO THEM. THE FOLLOWING PROGRAMS QUALIFY IN THIS CATEGORY:

METHODS TO PROMOTE A CAMPAIGN MAY INCLUDE MEDIA SUCH AS TELEVISION AND RADIO COMMERCIALS, WEB SITES, AND UTILIZATION OF PROMOTIONAL MATERIALS SUCH AS BROCHURES (SPANISH AND ENGLISH), VEHICLE SIGNS (BUSES, GARBAGE TRUCKS, ETC.), BOOKMARKS, AND MAGNETS, ETC.

SPECIAL EVENTS/PROGRAMS AND COMMUNITY PRESENTATIONS

AN EDUCATIONAL OR PROMOTIONAL EVENT WHERE CONSERVATION INFORMATION IS DISPLAYED AND AVAILABLE AND/OR PRESENTATIONS ARE GIVEN. EVENTS MAY INCLUDE HOME AND GARDEN SHOWS, ART SHOWS, COMMUNITY CELEBRATIONS, ENVIRONMENTAL SHOWS, ETC. TO RECEIVE FULL CREDIT FOR THIS MEASURE, A PROVIDER MUST ATTEND AND STAFF AT LEAST THREE EVENTS PER YEAR.

MARKET SURVEYS TO IDENTIFY INFORMATION NEEDS/ASSESS SUCCESS OF MESSAGES

PROGRAMS CAN BE TARGETED TOWARD HOMEOWNERS, LANDSCAPE PROFESSIONALS, AND/OR NON-RESIDENTIAL USERS. A PROVIDER THAT IMPLEMENTS MULTIPLE ADULT PROGRAMS/EFFORTS MAY BE ELIGIBLE TO RECEIVE CREDIT FOR MORE THAN ONE WATER CONSERVATION MEASURE IF THE PROGRAMS/EFFORTS CAN BE

SHOWN TO BE SEPARATE AND DISTINCT FROM ONE ANOTHER (I.E., A PROVIDER THAT MAINTAINS AN ACTIVE SPEAKERS BUREAU AND OFFERS A WORKSHOP SERIES IS ELIGIBLE TO RECEIVE CREDIT FOR TWO WATER CONSERVATION MEASURES).

YOUTH CONSERVATION EDUCATION PROGRAM

THE WATER PROVIDER WORKS WITH SCHOOLS IN ITS SERVICE AREA TO INCREASE STUDENTS' UNDERSTANDING OF WATER RESOURCES AND TO PROMOTE WATER CONSERVATION. THE PROGRAM MAY INCLUDE, BUT IS NOT LIMITED TO, A COMBINATION OF PROVIDING INSTRUCTIONAL ASSISTANCE, EDUCATION MATERIALS, TEACHER EDUCATION, CLASSROOM PRESENTATIONS, AND FIELD TRIPS TO WATER RELATED FACILITIES. A PROVIDER THAT IMPLEMENTS MULTIPLE YOUTH PROGRAMS MAY BE ELIGIBLE TO RECEIVE CREDIT FOR MORE THAN ONE WATER CONSERVATION MEASURE IF THE PROGRAMS CAN BE SHOWN TO BE SEPARATE AND DISTINCT FROM ONE ANOTHER (I.E., A PROVIDER THAT OFFERS FREE WATER CONSERVATION SCHOOL ASSEMBLIES WITH ACCOMPANYING PRINTED MATERIALS FOR ELEMENTARY SCHOOL STUDENTS AND ALSO DISTRIBUTES A MIDDLE SCHOOL STUDENT ACTIVITY BOOK AND TEACHER GUIDE IS ELIGIBLE TO RECEIVE CREDIT FOR TWO WATER CONSERVATION MEASURES).

NEW HOMEOWNER LANDSCAPE INFORMATION

THE WATER PROVIDER MAKES LOW WATER USE LANDSCAPE INFORMATION PACKETS AVAILABLE TO ALL NEW OWNERS OF NEWLY CONSTRUCTED HOMES, EITHER THROUGH DIRECT DISTRIBUTION (MAIL OR DELIVERY) OR THROUGH DELIVERY BY THE HOME BUILDER. THE PROVIDER ALSO NOTIFIES NEW OWNERS OF EXISTING HOMES (RESALE) THAT INFORMATION ON LOW WATER USE LANDSCAPING IS AVAILABLE AND MUST PROVIDE SUCH INFORMATION ON REQUEST. THE NUMBER OF NOTIFICATIONS SENT AND PACKETS MAILED MUST BE RECORDED AND NOTED IN THE PROVIDER'S CONSERVATION EFFORTS REPORT.
